The Ultimate Degree Wheel!

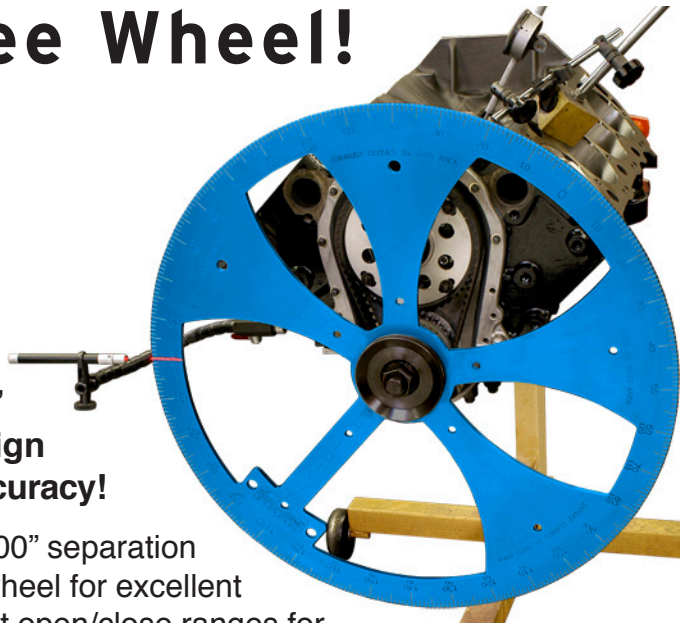

(Part# DGW-1)

**Mention This Flyer
For Special Pricing**

(Offer Extended Through December 2011)

**BHJ's 24" Laser Degree Wheel is "Hands-On!"
Super-rugged construction and precision design
provide the ultimate ease of use, flexibility & accuracy!**

The large, 1/4"-thick anodized billet wheel provides .200" separation per degree & all marks wrap around the edge of the wheel for excellent clarity. The four curved spokes show intake & exhaust open/close ranges for quick reference & allow **easy crank rotation by hand**, even with the complete valvetrain installed.

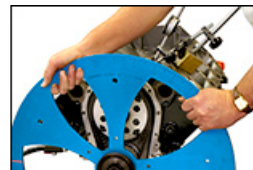

The easy-on, easy-off wheel allows cam & gear changes without resetting TDC, as the hub remains bolted to the crank when the wheel is removed. Locating dowels index the wheel to the hub in 15° increments for nearly unlimited TDC & pointer positioning. The laser pointer & flexible mounting arm accept bolt sizes from 1/4" to 9/16", allowing virtually any mounting location & ensure exact readability from all view points – thus eliminating viewing-angle issues & guesswork.

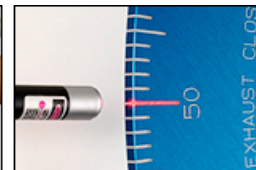

The heavy duty, billet steel hub has an integrated 1-1/4" hex & uses interchangeable crank adapters for simple, economical application changes. Adapters are available for all applications, including dual-keyways & custom sizes. The 4" O.D. knurled hand nut enables

4" Hand Nut

Hands-On Rotation

Laser Ease & Accuracy

quick, secure installation & removal of the wheel. The DGW-1 kit includes the 24" Wheel, Laser Pointer with flexible Mounting Arm & two-piece Hub with one Crank Adapter (specify size when ordering).

Additional information is available in the Valvetrain section of the website at BHJProducts.com
